

Blucube CCL-650 in-ceiling loudspeaker (pair)

The CCL-650 is a cost effective in-ceiling speaker that combines some features from the Kevlar range of speakers with an attractive price point. They provide an excellent base model for contractors and developers looking for a good quality in-expensive in-ceiling speaker solution, or indeed for those looking to fill the more indulgent rooms of the house with music. With rimless magnetic flat grilles these speakers have the same clean, sleek appearance and ease of install that are features of even the most expensive in-ceiling speakers.
